Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 and all claims dependent therefrom recite limitations comprising only logic. Since "logic" does not comprise any physical element, the use of the terminology, "A system" appears to be misdescriptive.

Claim Rejections - 35 USC §101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-15, as best understood, are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to

Art Unit: 3627

promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claims 1-2, 4-7, 9-12, and 14-15 only recite an abstract idea. The recited steps/logic of merely selecting between options, generating a new analysis, editing an analysis, and integrating a bid proposal, **do not** necessarily apply, involve, use, or advance the technological arts since all of the recited steps/logic can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of creating an analysis.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, claims 1-15 **do not** produce a tangible result. Further, claims 6-15 recite merely logic or computer code that is not embodied on a computer readable medium.

Because the claims do not meet the "useful, concrete, and tangible result" criteria, and because claims 1-2, 4-7, 9-12, and 14-15 are not within the technological arts as explained above, all claims are deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3627

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Duffy et al.

Duffy et al. disclose or inherently teach a supply chain governing framework utilizing a network-based interface including: selecting between a plurality of options (*i.e., generating a new RFP/RFQ, editing/modifying a prior RFP/RFQ, and integrating a bid proposal with an integrated analysis by engaging in a contract;* see paragraphs 0157-0159 and 0128) corresponding to a separate technique of creating a least cost analysis (see for example paragraphs 0088, 0112, 0114) for a buyer.

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The assignee, Restaurant Services Inc. (RSI), launched a product (RSI/Link) "to collect sales, shipment, pricing, and inventory information from Burger King's 350 suppliers and distributors" (See "A Whopping Inventory Task") in 1994.

The article "Burger King Orders AT&T Mail Service" discusses how "the E-mail network will replace a manual, paper-based tracking and ordering system."

The Examiner requests that the applicant provide the Office with any known information relevant to the above mentioned product launch.
